

CARDIAC CATHETERIZATION

STANDARD ADVISORY COMMITTEE (SAC) CHARGE

For Approval by the Certificate of Need (CON) Commission Chairperson as Delegated by the CON Commission on January 26, 2023

The Cardiac Catheterization SAC is charged to review and recommend any necessary changes to the Cardiac Catheterization Services CON Review Standards regarding the following:

1. Revise standards to align with the most recent Society for Cardiovascular Angiography and Interventions (SCAI) recommendations, Centers for Medicare and Medicaid Services (CMS), and other societal guidelines.
2. Consider modifications to the definition of “diagnostic cardiac catheterization services” to allow permanent pacemaker and ICD implantation procedures in ambulatory surgical centers to align with CMS.
3. Review standards and determine what procedures can be performed safely in which settings based on societal and federal guidelines.
4. Consider revisions to allow certain procedures in hospitals without on-site open-heart surgery.
5. Consider provisions to include access to cardiac catheterization services in rural areas, including initiation requirements for elective PCI.
6. Consider any other technical changes from the Department, e.g., updates or modifications consistent with other CON review standards and the Michigan Public Health Code.

In its deliberations of the above-mentioned charges, the SAC shall consider and report on how each recommendation addresses healthcare cost, quality and/or access in Michigan.
